

BASS  ROCK

OUR CAPABILITIES

## CAPABILITY STATEMENT AIR TRAFFIC MANAGEMENT REGULATORY COMPLIANCE

### At Bass Rock we offer specialised air traffic management regulatory compliance services designed to ensure that air traffic management operations meet the appropriate standards of safety and compliance with UK Civil Aviation Authority regulations.

Our expertise, rigorous assessments, and practical solutions are designed to support seamless regulatory adherence and operational excellence.

#### Capabilities:

**Regulatory Framework Analysis:** Review and understand the relevant air traffic management regulations, standards, and guidelines issued by aviation authorities to ensure compliance.

**Non-Compliance:** We have demonstrable experience in the development of safety arguments for regulatory non-compliance and gaining regulatory acceptance. We believe key to the acceptability of a non-compliance is early and open engagement with the regulator and the presentation of a clear and concise safety argument.

**Compliance Assessment:** Evaluate current air traffic management operations, procedures, and systems against regulatory requirements to identify any gaps or non-compliance issues.

**Implementation of Controls:** Develop and implement procedures, controls, and practices to address identified compliance gaps and ensure alignment with regulatory standards.

**Monitoring and Reporting:** Continuously monitor operations and practices to ensure ongoing compliance and prepare reports for regulatory authorities detailing adherence and any deviations.

**Audits and Inspections:** We can conduct internal audits and inspections to verify compliance with regulatory standards and address any findings with corrective actions.

**Incident Management:** Develop procedures for managing and reporting any incidents or non-compliance issues, including investigation, resolution, and communication with regulatory bodies.

**Continuous Improvement:** Regularly review and update compliance practices and procedures in response to changes in regulations, industry standards, or operational requirements to maintain effective regulatory adherence.

#### Experience:

**Unique Operational Environments:** Often assisting companies who need to provide an alternative. Acceptable Means of Compliance by demonstrating a compelling safety argument.

Our approach combines in-depth regulatory knowledge, rigorous compliance assessments, and practical implementation strategies to support aviation organisations in navigating complex regulatory environments. Our goal is to ensure safety, efficiency, and regulatory adherence in air traffic management.
